

# ComfortZone™ Infrared Heating Elements

## 20,000 HOURS OF HEAT

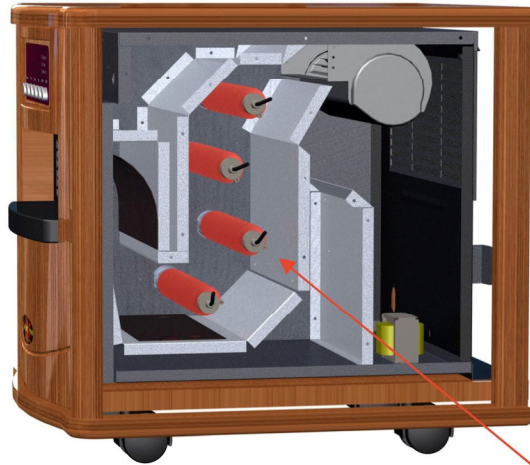

ComfortZone™ Infrared heating elements are rated to last a minimum of 20,000 hours, or about 6 to 10 years, depending on usage — four times longer than competitor infrared heating elements.

## 3-YEAR WARRANTY

ComfortZone™ is covered under a 3-year warranty, including the infrared heating elements.

## REPLACING IS EASY

Replacing the infrared heating elements is easy and requires only a screwdriver and a few minutes. Other infrared heaters require servicing by the original manufacturer and may take weeks for shipping and service — just to replace the heating elements! With ComfortZone™, you will never have to be without your heater.

- Rated to last 20,000 hours
- Covered by a 3-year Warranty
- Easily replaceable
- Needs only 4 heating elements
- \$15 each, after warranty expiration

ComfortZone™ Infrared Heating Elements

ComfortZone™ Infrared Heating Element

Competitor Infrared Heating Element

ComfortZone™ Quartz Infrared Portable Heaters use four large, high-efficiency infrared heating elements - or bulbs - rather than the six smaller heating elements used by other infrared heaters. Each ComfortZone™ infrared heating element is rated to last a minimum of 20,000 hours, or about 6 - 10 years, depending on use. That's 4 times longer than most other infrared heater bulbs.

The unique interior of the ComfortZone™ Infrared Heater has been thoughtfully designed with the consumer in mind. Each infrared heating element is easy to replace with only a screwdriver and a few minutes.

Compare that to other infrared heaters that must be sent back to the original manufacturer for heating element replacement, which could mean going several weeks without your heater.
